I am a software developer with four years of experience in frontend and backend technologies, specializing in scalable applications, user-centric design, API integration, and optimized system architecture.

EDUCATION

Concordia University

Masters of Science in Applied Computer Science, GPA: 3.3/4.3

Montreal, QC, Canada

Sep 2022 – May 2024

SKILLS

Languages: Java, Python, C++, C, JavaScript, TypeScript, HTML, Tailwind CSS

Database: SQL Server, MySQL, NoSQL, MongoDB

Frameworks: Angular, React, Next.js, RxJS, Spring Boot and Hibernate, Node.js, JUnit, Numpy, Django, Flask

Other tools: Git, GitHub, GitLab, JIRA, Postman, Agile, Socket.io, Zustand

Testing/QA Skills: Performance Testing, Functional Testing, Test Automation, UAT, SDLC, STLC

WORK EXPERIENCE

Concordia University

Technical Support & Systems Management

Montreal, Canada

Feb 2023 - Jan 2025

- Diagnosed and resolved technical issues related to **software, networks, and system performance**, ensuring smooth IT operations for faculty and students.
- Gained hands-on experience with system administration and troubleshooting, enhancing **analytical thinking** and technical **debugging** skills applicable to software development.

CG Infinity

Full Stack Developer

Noida, India

July 2020 - July 2022

- Migrated legacy **MVC architecture** to an **Angular** application for Alliant Group, improving performance by 40%, and redesigned Shell Energy's Partner and Pricing Portal using **ASP.NET** Web Forms to enhance site reliability.
- Developed a robust **CMS** and a realtor website for Camillo Properties using **Angular, Node-RED, and SQL**, enabling 90% faster content updates and boosting business revenue by 30% through **API integration** and optimized property management.

CG Infinity

Software Developer Intern

Noida, India

Sep 2019 – June 2020

- Utilized **Node.js, MongoDB, HTML/CSS, AJAX** and **JQuery** to develop the CG Infinity Portal, streamlining the hiring process.

PROJECTS

- Whispr:** Built a real-time chat app using **React, Node.js, and Socket.io**, with **Zustand** for state management and **Tailwind CSS** for a sleek UI. Implemented real-time messaging, interactive UI elements with Lucide React, and smooth notifications via **React Hot Toast** for an enhanced user experience.
- DealMart - An Ecommerce Website:** Developed a comprehensive e-commerce platform using **Java, React.js, Spring Boot, and Hibernate**, with **MySQL** as the database. The platform features seamless user authentication, intuitive product browsing, efficient cart management, real-time order tracking, and interactive product rating and review capabilities.
- Classification of Plant Leaves Classification using Computer Vision and Deep Learning:** Collaborated on the classification of plant leaves using **Python** and **TensorFlow**, incorporating **NumPy** for data manipulation and **Matplotlib** for visualization. The project involved image pre-processing, data augmentation, and transfer learning to optimize model performance, achieving higher accuracy and reduced overfitting.
- Roboprof:** Developed a virtual assistant using **Python, RASA, and SpaCy**, integrating **knowledge graphs** and **natural language processing (NLP)** to facilitate student access to university information through conversational AI.
